-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 15 July 2008.  
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of group I in the reply filed on 7/15/08 is acknowledged. The traversal is on the ground(s) that all the groups contain the special technical feature. This is not found persuasive because for the reasons of record.

The requirement is still deemed proper and is therefore made FINAL.

### ***Drawings***

2. Figures 16(A), 16(B), 17(A), 17(B), and 18(A)-(C) should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance. Also, Figures 16A and 16B have a common numeral and common arrows which is unacceptable- each Figure must have its own numerals and arrows.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1794

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated over by each of EP 1283100 or JP 2001-293751. The references each disclose a circular resin molded product having a circular center hole said product being formed by injection molding through an annular gate; see the Abstracts. Each of these products will inherently have an annular gate trace projecting in an axial direction of the circular product in view of the resin having been injected through an annular gate and cooled in the annular gate.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by 2001-353753. The reference discloses a circular resin molded product having a circular center hole said product being formed by injection molding through an annular gate; see the Abstract. The product will inherently have an annular gate trace projecting in an axial direction of the circular product in view of the resin having been injected through an annular gate and cooled in the annular gate.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over each of EP 1283100, JP 2001-293751 or 2001-353753. The references each disclose a circular

resin molded product having a circular center hole said product being formed by injection molding through an annular gate; see the Abstracts. Each of these products will inherently have an annular gate trace projecting in an axial direction of the circular product in view of the resin having been injected through an annular gate and cooled in the annular gate. It would have been obvious to one of ordinary skill in the art to form the annular gate at an outer circumference location, radially central location or adjacent to the center hole since a shifting of parts is within the general skill of a worker in the art; In re Japikse 86 USPQ 70 (CCPA 1950).
